

THINK BIGGER

Large Unmanned Systems

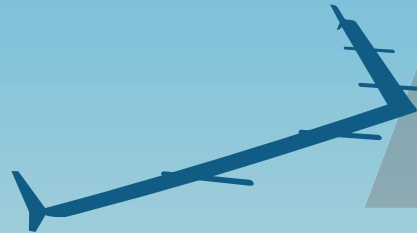

In the not-too-distant future, large UAS will begin populating the skies: transporting cargo, fighting fires, delivering WiFi and even flying people around the world.

60K JOBS
Created by 2036

\$30 BILLION
Annual Industry

Passenger Travel
Autonomous flying taxis & jets will transport people across cities & around the globe

WiFi From the Sky
High-altitude UAS will beam down internet to major cities & underserved communities

Cargo Transport
Autonomous aircraft will transport packages & cargo without human intervention

Firefighting & Rescue
Large UAS will enable a new era in public safety & law enforcement, including firefighting & rescue operations

Pipeline Inspection
Remotely controlled aircraft will monitor & inspect critical infrastructure & industrial facilities

ACT NOW

To realize this \$30 billion annual market, the U.S. must foster an environment to design and certify aircraft, and invest in the infrastructure to support it.
